BILATERAL ECONOMIC COOPERATION BETWEEN JAPAN AND UZBEKISTAN

In the early nineties of the XX century the importance of Central Asian region seemed insignificant for Japan. However, when the Prime Minister of Japan in 1997, Ryutaro Hashimoto, put forward the concept of “Silk Road Diplomacy”, this concept developed significant changes in Japan's policy in Central Asia. The “Central Asia + Japan” Dialogue initiated in 2004 marked the transformation of the presence and influence of Japan in the region towards active pragmatism. Since that time, Japan started to support the Central Asian countries economically through investments and financial aid.

Among the countries of the region gaining support from Japan, Uzbekistan has the highest priority. Uzbekistan has engaged in active cooperation with Japan since the establishment of diplomatic relations in 1992. The main documents guiding the economic cooperation between Uzbekistan and Japan are the “Declaration on Friendship, Strategic Partnership and Cooperation”, the Joint Declarations “On the Development of Economic Co-operation and Assistance to Economic Reforms in Uzbekistan” (2002), the agreements “On Liberalization, Mutual Protection and Encouragement of Investments” (2009) and “On Deepening and Expanding Strategic Partnership” (2015).

According to the Government of Uzbekistan, the mutual trade turnover with Japan grew from $189.5 million in 2014 to $253.4 million in 2015 with 25% increase. For comparison, the bilateral trade turnover in 2013 and 2012 totaled $215 million and $214.7 million respectively. It should be noted that despite the fact that Uzbekistan – Japan trade turnover is much lower than the trade turnover between Kazakhstan and Japan amounted to $1.4 billion in 2015, it far exceeds Japan's trade turnover with Turkmenistan amounted to $27 million by the end of 2015. Basically, Uzbekistan exports minerals and chemical products to Japan and imports automobiles and telecommunications equipment.

Uzbekistan is involved in the Japanese government program “Official Development Assistance (ODA)” (also called Yen Loan). This Program provides the developing countries specific loans which have long-term low interest rates and which should be paid back. To date, the total amount of funds provided to Uzbekistan through the ODA loans is about $2 billion (276,630 million yen), including $221 million (26,872 million yen), which was allocated in 2015.

Through the regional offices of Japan International Cooperation Agency (JICA), Japan External Trade Organization (JETRO) and the Uzbek – Japanese Center that have been operating in Uzbekistan since 1999, the Japanese side continues to invest in projects in the fields such as rail transport, oil and gas, energy, mining, automobile industry, telecommunications, textile industry and tourism. For instance, within the development of the textile and light industry in Uzbekistan two projects have been implemented with the help of Japanese Marubeni Corporation and Kanebo company. These projects are joint ventures for the production of cotton yarn and “khaki” fabric texture for export, as well as enterprises as a complex of textile industries. Credit for the projects was provided by the Japan Bank for International Cooperation. The total investment for each project was $11 million.

There is also an active cooperation between Uzbekistan and JICA in the country’s railway infrastructure. A good example of Japanese – Uzbek cooperation is the construction of the 223 km long “Tashgazar – Boysun – Kunkurgan” railway line, which was commissioned in 2007. Another example is the modernization of the 325 km long “Karshi – Termez” railway section, the construction of which was made according to an agreement with $221 million in 2012. The implementation of these two projects has helped the 831.5 km long “Tashkent – Termez” railway route which is fully electrified and modernized to be put into operation.

The project of modernization of Tashkent Thermal Power Station with a value of $57 million should be considered as an example of Uzbek – Japanese cooperation in the energy sector between Uzbekenergo and Tohoku Electric Power Co. The project was funded by a grant from the Japanese Organization for the Advancement of Energy and Industrial Technology (NEDO) in the amount of $38 million and Uzbekenergo's own funds of $19 million. In addition, the loan agreement which was signed in 2013 on co-financing the modernization of Talimjaran Thermal Power Plant in southern Uzbekistan in the amount of $300 million by JICA allowed to increase electricity generation efficiency from 30% to over 50%, reducing carbon emissions.

In order to ensure stable supply of uranium concentrate to the country, Japan began exploration of uranium deposits in Uzbekistan. In September 2006, a Japanese – Uzbek intergovernmental agreement was signed aiming to finance Uzbek uranium development. In 2008 Mitsui & Co. signed a basic agreement with the Uzbek government's Goscomgors as joint venture for geological investigations regarding the development of black-shale uranium resources at the Zapadno – Koppatassakaya mine. In 2013, the Japanese company JOGMEC received a license to conduct exploration works for uranium in two prospective areas with sandstone uranium deposits in eastern and Tamdiykuduk – Tulyantash, for five years.

According to the primary assessments, the total investment in exploration is amounted to $10 million.

During the visit of the Japanese Prime Minister Shinzo Abe to Uzbekistan in October 2015, the leaders of the two countries reached agreements on the implementation of joint investment projects worth more than $8.5 billion for the coming years in such areas as modernization of energy and transport infrastructure, development and processing of mineral resources, automobile industry, oil and gas and chemical industries, telecommunications and other advanced manufacturing industries. It was agreed that Japan's contribution would reach $5 billion. The most promising areas for the implementation of projects were discussed during the 13th meeting of the Committee on Economic Cooperation of Uzbekistan and Japan held in March 2016 in Tashkent. It is worth mentioning that after the 12th session of the Uzbek – Japanese Committee on Economic Cooperation held in Tokyo in 2015, the parties signed a package of investment, loan agreements and technical assistance projects totaling $3.8 billion.

It can be concluded that Japan's interest in Central Asia, particularly in Uzbekistan is increasing. There is no doubt that Tokyo will provide further evidence of its intention to cooperate with the Central Asian countries at the forthcoming 6th Meeting of the “Central Asia + Japan” Dialogue, which is to be held in November 2016 in Ashgabat at the level of the Foreign Ministers. It is worth noting that Japan's commitment to develop and strengthen mutually beneficial partnership with Central Asia was clearly demonstrated during the Japanese Prime Minister Shinzo Abe’s tour of Central Asia in autumn 2015. Therefore, it seems essential for Japan to expand bilateral cooperation with Uzbekistan and the Japanese authorities will make all necessary efforts to promote multidimensional relations with Tashkent. It may also be assumed that after the death of Uzbekistan’s first President, Islam Karimov, the new leader of the country will continue to deepen the Uzbek – Japanese economic cooperation implementing the foreign policy of his predecessor.
Politics, Foreign Affairs and Security

- During the session of the Council of Elders held in Ashgabat, the Constitutional Law on Approval of the new edition of the Constitution of Turkmenistan was adopted. As a result of the constitutional reform, 28 articles have been added, 24 of which are new. In all, 107 articles were amended and supplemented and one new section has been added to the Constitution.
