THE DEVELOPMENTS IN THE TOURISM SECTOR IN UZBEKISTAN

The improvement of transportation systems, development of communications, urbanization and growing mobility of population and their social wealth are important factors positively affecting the tourism sector in the world. Under these conditions, we are witnessing the rapid growth of the tourism sector in many countries. According to the United Nations World Tourism Organization (UNWTO), tourism accounts for 7% of the world exports, in total and for 30% of exports in services. In the last four years, the tourism sector remained the fastest growing export-oriented sector of economy in the world. In 2015, revenues from international tourism grew by 3.6% compared to the previous year and reached $1,232 billion, while the number of international tourist arrivals increased by 4.4% in 2015, reaching a total of 1,184 million compared to 1,133 million in 2014. The potential of the tourism sector is evident taking into account that it ranks third after the fuels and chemicals in the ranking of the world export industries ahead of the food and the automotive products.

Uzbekistan, like the other countries is extremely interested in the development of the tourism sector. This Central Asian country has more than 7,000 monuments of cultural heritage of different epochs and civilizations, including the historical centers of Bukhara, Khiva, Samarkand and Shakhrisabz inscribed on the UNESCO World Heritage List. For example, Samarkand is included in the Huffington Post’s Top 50 Cities to See in Your Lifetime. Taking into account the fact that Tashkent pays great attention to preservation and enhancement of the historical and cultural heritage, revival of national traditions and customs, and reconstruction and arrangement of key tourist destinations of the country, there is no doubt that Uzbekistan possesses great tourism potential.

In order to provide sustainable development of this sector, the Government of Uzbekistan initiated diversified and integrated plans, policies, programs and projects. An important step in the implementation of the state policy to promote tourism sector was the foundation of the National Company, Uzbektourism, in 1992, which administers activities of related enterprises and organizations and is engaged in the corresponding personnel training. Moreover, the Law “On Tourism” was adopted in 1999. It was multidimensional legal regulation that formed the basis for more than 30 laws/decrees in the sphere of tourism. For instance, the Presidential Decree "On training of qualified personnel for the tourism industry in Uzbekistan" dated June 30, 1999 and Resolution of the Cabinet of Ministers "On measures to further support and develop tourism in the Republic of Uzbekistan" dated October 10, 2012 contributed to creation of a number of schools for training of qualified specialists in the field of tourism. As of today, there are five higher education institutions and 12 specialized professional colleges in this area. Moreover, all current developments in the sphere of tourism are underway under the Tourism Development Program for 2016-2019.

As a result, the number of tourists who travel to the country is constantly increasing. For instance, in 2005, the number of tourists visiting Uzbekistan totaled 240 thousand people, while in 2015, over 2 million tourists visited the country. In 2015, the major international tourist flow to Uzbekistan was provided by the citizens of Russia (22.4%), South Korea (8.2%), Germany (3.8%) and France (3.6%). It should be highlighted that after gaining independence, Uzbekistan has been actively increasing cooperation with international organizations such as the United Nations World Tourism Organization. After becoming a member of the UNWTO in 1993, Uzbekistan joined initiative of the revival of the Great Silk Road tourism made by the UNWTO together with the UNESCO. In 1994, the representatives of 19 Silk Road countries adopted the Samarkand Declaration on the Silk Road Tourism. The Khiva Declaration on Tourism and Preservation of Cultural Heritage, supported by the UNWTO, the UNESCO and the Council of Europe was adopted in 1999. The Bukhara Declaration on Tourism along the Silk Road, which emphasizes the benefits of sustainable tourism and identifies concrete steps to promote cultural and ecological tourism on the Silk Road was adopted in 2002. Moreover, the Silk Road Action Plan developed jointly by the UNWTO and Uzbekistan was adopted in 2010. In recognition of Uzbekistan’s contribution to the improvement of international tourism industry, the Regional Office of the UN-WTO for the coordination of the development of tourism on the Silk Road was founded in the city of Samarkand in 2004.

A valuable contribution to the development of regional tourism market is made by the Tashkent International Tourist Fair, which has been held annually since 1995. This fair is an important international forum in Central Asia and an excellent platform for constructive dialogue between partners in the tourism sector. Today it is the largest forum in Central Asia, where industry professionals meet and negotiate in various formats, including business-to-business activities.

Nowadays, Uzbekistan pursues a policy of stimulating the development of tourism infrastructure and strengthening the position of the country in the international tourism sector. There are 1176 tourism agencies, including 621 tour operators and 555 hotels, tourist bases and campsites in the country. An extensive network of hotels numbering a total of over 25,000 beds meets international standards. Since independence, 11 airports have received international status in Uzbekistan through construction and reconstruction of infrastructure facilities. Along with the traditional trains and high speed trains by the Spanish Talgo (with a speed of 270 km/h) run between Tashkent, Samarkand and Bukhara.

However, despite the fact that Uzbek tourist operators can offer visitors tourism opportunities in different spheres such as active, historical and cultural, archaeological, extreme and gastronomic tourism, in 2015, the share of tourism in the gross domestic product of Uzbekistan amounted only to 2% and the volume of exports of tourism services reached over $ 615 million. For instance, Uzbekistan was not included in the Travel & Tourism Competitiveness Index Ranking 2015, while Russia, Kazakhstan and Tajikistan were ranked 45, 85 and 119 respectively. Therefore, Uzbekistan has just started embarking on transforming the tourism sector into the engine of its economy. In this regard, it should be kept in mind that tourists from developed countries would be, with no doubt, more interested in combined tours in Uzbekistan and Kazakhstan, as well as in other Central Asian countries, which have a rich historical heritage.
